

ELIE YAHCHOUCY

Independent Senior IT Consultant | Fractional IT Manager

IT CONSULTING CAPABILITY STATEMENT • LEBANON

Reliable IT management for growing businesses.

Senior-level IT leadership and practical oversight for organizations that need clearer ownership, stronger infrastructure, better security and dependable technology operations - without adding unnecessary complexity.

18+ YEARS IT experience	14+ YEARS IT management leadership	AR • EN • FR Business & technical communication
-----------------------------------	--	---

CORE CAPABILITIES

Fractional IT Management Senior oversight, priorities, planning, vendor decisions and ongoing technology ownership.	IT Assessment & Prioritization Structured review of the current environment, risks, weaknesses and practical next steps.
Microsoft 365 Administration, identity and access, email, licensing, user management and practical security.	Infrastructure & Networking Servers, virtualization, networks, Wi-Fi, firewalls, modernization and performance improvement.
Cybersecurity Access controls, firewall management, endpoint security, hardening and practical risk reduction.	Backup & Business Continuity Backup strategy, recovery planning, disaster recovery and availability of critical systems.
IT Projects & Vendor Management Requirements, solution evaluation, procurement, supplier coordination, testing and handover.	IT Operations & Team Oversight Day-to-day operational ownership, issue follow-up and senior support for internal IT teams.

Best fit: growing SMEs that need senior IT oversight, stronger internal IT leadership, project/vendor coordination or a practical path to improve reliability, security and continuity.

Engagements can start small and expand as the need becomes clearer.

The engagement model is matched to the business need. Some organizations need an independent assessment or a focused project; others need regular operational ownership or fractional IT leadership.

01 IT Assessment Review the current environment, identify risks and define practical priorities before committing to larger changes.	02 Project-Based Consulting Focused support for infrastructure, Microsoft 365, networking, cybersecurity, migrations and upgrades.
03 Ongoing IT Management Regular oversight of day-to-day IT operations, vendors, recurring issues, maintenance priorities and follow-up.	04 Fractional IT Manager Senior IT leadership for businesses that need ownership of technology priorities, planning, vendor decisions and internal coordination.

REPRESENTATIVE RESPONSIBILITIES

Experience built through responsibility for live business environments.

Business-Critical Infrastructure & Continuity Server, network and business-system availability, maintenance planning, backup, recovery and continuity.	Network Security & Firewall Modernization Security policies, access rules, filtering, network improvements and coordination with providers.
Microsoft 365 & Collaboration Administration, identity and access, licensing, Exchange/Outlook requirements, workflow and integration needs.	Vendor, Solution & Project Coordination Requirements clarification, technology evaluation, supplier coordination, implementation follow-up, testing and handover.
IT Operations & Team Support Operational ownership, issue prioritization, escalation, documentation and senior support for internal IT staff.	Planning & Management Guidance Technology priorities, budget considerations, risk reduction and practical recommendations aligned with business needs.

TYPICAL ENGAGEMENT OUTPUTS

Current-state findings	Prioritized actions	Implementation roadmap	Vendor / project follow-up	Handover & documentation
------------------------	---------------------	------------------------	----------------------------	--------------------------

EXPERIENCE & CREDIBILITY

Technical depth with long-term IT management responsibility.

My background combines hands-on engineering, enterprise support, infrastructure administration and more than 14 years of IT management leadership. The focus is practical: keep business systems reliable, secure and aligned with operational priorities.

2012 - Present
